

Git Hands-on 2

Create a **“.log”** file and a **log folder** in the working directory of Git. Update the **.gitignore** file in such a way that on committing, these files (.log extensions and log folders) are ignored.

Verify if the git status reflects the same about working directory, local repository and git repository.

Output :

```
MINGW64:/e/Cognizant Deep Skill Study/DotNet_FSE_Angular_hands_on_Exercise/Week 6 Solved Exercise/Git/Hands-on 1/GitDemo
