

SQL Exercise Stored Procedure

```
CREATE DATABASE EmployeeDB;
```

```
USE EmployeeDB;
```

```
CREATE TABLE Departments
```

```
(
```

```
    DeptId INT PRIMARY KEY,
```

```
    DeptName VARCHAR(100)
```

```
);
```

```
CREATE TABLE Employees
```

```
(
```

```
    EmpId INT PRIMARY KEY,
```

```
    FirstName VARCHAR(50),
```

```
    LastName VARCHAR(50),
```

```
    DeptId INT
```

```
        FOREIGN KEY REFERENCES Departments(DeptId),
```

```
    Salary DECIMAL(10,2),
```

```
    JoinDate DATE
```

```
);
```

```
INSERT INTO Departments
```

```
(DeptID, DeptName)
```

```
VALUES
```

```
(1,'HR'),
```

```
(2,'Finance'),  
(3,'IT'),  
(4,'Marketing');
```

```
INSERT INTO Employees  
(EmpId, FirstName, LastName, DeptId, Salary, JoinDate)  
VALUES  
(1,'John','Doe',1,5000.00,'2020-01-15'),  
(2,'Jane','Smith',2,6000.00,'2019-03-22'),  
(3,'Michael','Johnson',3,7000.00,'2018-07-30'),  
(4,'Emily','Davis',4,5500.00,'2021-11-05');
```

```
SELECT * FROM Departments;  
SELECT * FROM Employees;
```

Exercise 1: Create a Stored Procedure

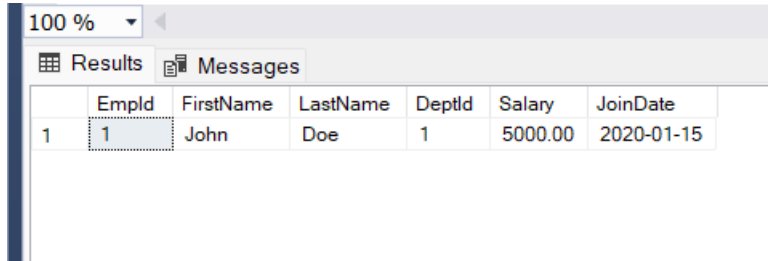

Goal: Create a stored procedure to retrieve employee details by department.

```
CREATE PROCEDURE sp_GetEmpByDept  
    @DeptId INT  
As  
BEGIN  
    SELECT * FROM Employees  
        WHERE DeptId = @DeptId;  
END;
```

Run the Stored Procedure :

EXEC sp_GetEmpByDept @DeptId = 1;

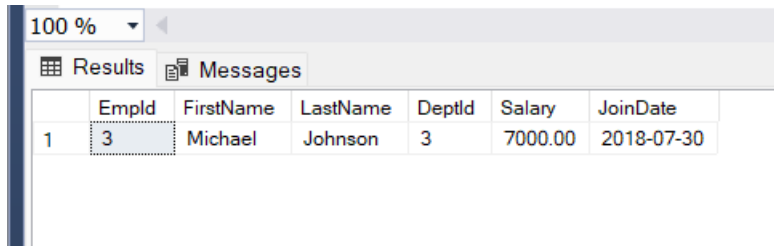

Output :

	Empld	FirstName	LastName	DeptId	Salary	JoinDate
1	1	John	Doe	1	5000.00	2020-01-15

EXEC sp_GetEmpByDept @DeptId = 3;

Output :

	Empld	FirstName	LastName	DeptId	Salary	JoinDate
1	3	Michael	Johnson	3	7000.00	2018-07-30

Create Stored Procedure sp_InsertEmployee :

CREATE PROCEDURE sp_InsertEmp

 @Empld INT,

 @FirstName VARCHAR(50),

 @LastName VARCHAR(50),

 @DeptId INT,

 @Salary DECIMAL(10,2),

 @JoinDate DATE

AS

```

BEGIN

    INSERT INTO Employees

    (

        Empld, FirstName, LastName, DeptId, Salary, JoinDate

    ) VALUES

    (

        @Empld, @FirstName, @LastName, @DeptId, @Salary,

@JoinDate

    );

END;

```

Execute sp_InsertEmployee :

```

EXEC sp_InsertEmp

    @Empld = 5, @FirstName = "Rohit",

    @LastName = "Pawar", @DeptId = 3,

    @Salary = 500000, @JoinDate = '2026-08-10';

SELECT * FROM Employees;

```

Output :

	Empld	FirstName	LastName	DeptId	Salary	JoinDate
1	1	John	Doe	1	5000.00	2020-01-15
2	2	Jane	Smith	2	6000.00	2019-03-22
3	3	Michael	Johnson	3	7000.00	2018-07-30
4	4	Emily	Davis	4	5500.00	2021-11-05
5	5	Rohit	Pawar	3	500000.00	2026-08-10
