

11. ReactJS-HOL

Create a React Application “eventexamplesapp” :

```
import { useState } from "react";
import Counter from "./Counter";
import CurrencyConvertor from "./CurrencyConvertor";
import "./App.css";

function App() {
  const [activeTab, setActiveTab] = useState("counter");

  return (
    <div style={{ minHeight: "100vh", backgroundColor: "#ecf0f1" }}>
      {/* Header */}
      <div
        style={{
          backgroundColor: "#1a5490",
          color: "white",
          padding: "20px",
          textAlign: "center",
          marginBottom: "20px",
        }}
      >
        <h1 style={{ margin: 0 }}> ⚡ React Event Handling Examples</h1>
        <p style={{ margin: "10px 0 0 0", fontSize: "14px" }}>
          Learn onClick, onChange, onMouseEnter, onMouseLeave & Synthetic Events
        </p>
      </div>

      {/* Navigation Tabs */}
```

```

<div
  style={{
    display: "flex",
    justifyContent: "center",
    gap: "15px",
    marginBottom: "20px",
    padding: "0 20px",
  }}
  >
  <button
    onClick={() => setActiveTab("counter")}
    style={{
      padding: "10px 20px",
      fontSize: "16px",
      backgroundColor: activeTab === "counter" ? "#27ae60" : "#95a5a6",
      color: "white",
      border: "none",
      borderRadius: "5px",
      cursor: "pointer",
      fontWeight: "bold",
      transition: "background-color 0.3s",
    }}
    >

```

Counter Events

```

</button>

<button
  onClick={() => setActiveTab("currency")}
  style={{
    padding: "10px 20px",
    fontSize: "16px",
    backgroundColor: activeTab === "currency" ? "#2980b9" : "#95a5a6",
    color: "white",

```

```
border: "none",
borderRadius: "5px",
cursor: "pointer",
fontWeight: "bold",
transition: "background-color 0.3s",
}}>
```

 Currency Convertor

```
</button>
```

```
</div>
```

```
{/* Content */}
```

```
{activeTab === "counter" ? <Counter /> : <CurrencyConverter />}
```

```
{/* Footer */}
```

```
<div
```

```
style={{
```

```
  backgroundColor: "#34495e",
```

```
  color: "white",
```

```
  padding: "20px",
```

```
  textAlign: "center",
```

```
  marginTop: "30px",
```

```
  fontSize: "12px",
```

```
}} >
```

```
<p style={{ margin: 0 }}>
```

 React Events Mastery | Exercise 11 | Event Handling & Synthetic

Events

```
</p>
```

```
</div>
```

```
</div>
```

```
);
```

```
}
```

```
export default App;
```

Output :

Increment :

Decrement :
